ANNUAL REVIEWS

The Review Article: The Logical Starting Point for Relevant Research

About Annual Reviews Publications

Annual Reviews publications review 40 focused disciplines within the Biomedical, Life, Physical, and Social Sciences. Annual Reviews publications are available to individuals, societies, libraries, and consortia worldwide. All Annual Reviews publications are available online beginning with our first publication, the *Annual Review of Biochemistry*, in 1932.

What Is a Review Article?

A review article is a gateway to essential primary research. They critically examine and qualify the wide array of primary research material published and available to the scientific community on a chosen topic. Review articles survey primary research — including books, articles, and other sources — relevant to a particular area of inquiry or research to summarize and evaluate each important idea and finding. Annual Reviews, a dynamic collection of review articles across the spectrum of biomedical, life, physical and social sciences, provides you with the definitive resource of past and present research in a given topic.

Annual Reviews Offers Your Patrons

The Latest Developments in Science

Each year, distinguished researchers and editors critically review, synthesize, and filter the vast amount of primary research in specific disciplines to guide researchers to the principal contributions of their field and to help them keep up to date in their area of research, saving time and effort.

The Premier Names in Science

All topics for review are selected by an editorial committee. Our committees and our authors are some of the most distinguished scholars of their discipline. All reviews are written by invitation-only.

The Highest ISI® Rankings

Annual Reviews publications are ranked among the highest by Impact Factor of publications assessed and indexed by the ISI® Journal Citation Reports (JCR®).

Full Text, Searchable Online Access

Each article is its own search engine, providing a gateway to the essential primary research literature referenced within each topic. Access Annual Reviews publications via the campus library.

Lasting Value

Historically Annual Reviews' articles have had a significantly longer usage life than the primary literature. Annual Reviews Impact Factors, a measure of the number of times the average article is cited, are among the highest in the world.

ANNUAL REVIEWS PUBLICATIONS

Annual Reviews series are published each year, in print and online, in 40 focused disciplines in the Biomedical, Life, Physical and Social Sciences. Annual Reviews publications are available to institutions, libraries, and consortia worldwide.
