

# Our data, our analysis: Your resource for the world economy

SourceOECD, the OECD's online library, simplifies access to publications and statistical databases.

The breadth and variety of SourceOECD content is such that whatever your need, from undergraduate research to the highest level of policy or technical decision-making, you will find something to help you get the answer.

SourceOECD has been created to be the resource for your everyday work and research. Your profile can be tailored to your own personal needs or the needs of your organisation, from access to just one theme or content type to unlimited access to all of SourceOECD.

See back page for contact details or email [sourceoecd@oecd.org](mailto:sourceoecd@oecd.org) for more information. To find out more about OECD publishing and to see whether your institution is among the 800 world wide who already subscribe to our service, visit [www.oecd.org/publishing](http://www.oecd.org/publishing).

## Our data

The OECD is a world leader in the collection and dissemination of reliable and comparable statistics. Official data is collected from the 30 member countries and increasingly, key non-member economies such as China, Russia and Brazil.

## Statlinks

OECD publications are packed with tables, charts and graphs - imagine being able to take these ready-prepared data straight from the book and use them directly in your own work. Thanks to the OECD's new Statlinks service, you can now do exactly this. Statlinks are electronic links which give you access to the underlying Excel® spreadsheets, allowing you to re-use the figures and graphs for your own purposes. They are being introduced into every relevant OECD publication and have earned the Association of Learned and Professional Society Publishers "Highly Commended" Award for Publishing Innovation.

## Interactive databases

And what if you want to make your own tables and graphs? SourceOECD gives you access to 30 databases, spanning a huge diversity of topics, all through a single interface. The databases present the most up-to-date figures available and, in some cases, go back as far as the 1960s. You can easily access the data and export them in standard formats such as .xls and .csv in order to present the results and conduct analysis, the way you want. All structural and reference metadata are included within the databases.

## About the OECD

The OECD unites the expertise and experience of the world's leading economies to address the economic, social, environmental and governance challenges of the globalising world. Drawing upon the specialist knowledge of experts from its 30 member countries and 100 partner countries, the OECD is in a unique position to offer reliable data and insightful analysis on a very wide range of topics.

## Our analysis

The OECD unites experts from around the world to study the key socio-economic problems facing both member and non-member countries. Analysis ranges from our renowned regular reports on core topics, to more specialised research on emerging and technical issues.

## OECD facts at a glance

If you need quick, informative overview of a topic then OECD "at a glance" publications are for you. The most successful of these is the OECD Factbook which gives access to over 150 indicators, covering the whole range of policy areas addressed by the OECD. The Factbook has been a huge hit with students, teachers, policymakers and journalists worldwide as it gives an immediately accessible overview of today's key issues. Other books in the OECD "at a glance" series use the same approach to deal with individual topics such as health or environment. All 'at a glance' books use the same clear, double-page format - presenting tables, graphs, explanatory text and references for further reading for each indicator.

## Analysis to suit your needs

SourceOECD is your gateway to the whole range of OECD expert analysis. Probably best-known are our reports and outlooks on the central issues of our member economies such as the *Employment Outlook* or country-based *Economic Surveys*. These in-depth and comprehensive publications are completely updated on a regular basis. In addition, the OECD produces a huge body of specialised work dealing with more specific issues ranging from highly technical studies to forward-looking reports on cutting-edge developments and concerns. You might be surprised by just how much OECD publications have to offer.

## Member countries

Australia • Austria • Belgium • Canada • Czech Republic • Denmark  
Finland • France • Germany • Greece • Hungary • Iceland • Ireland  
Italy • Japan • Korea • Luxembourg • Mexico • Netherlands  
New Zealand • Norway • Poland • Portugal • Slovak Republic  
Spain • Sweden • Switzerland • Turkey • United Kingdom  
United States.

SourceOECD is a subscription service that is available from a wide range of international sales partners :
