

Research and knowledge at the heart of development

## **Effectively building capacity for impact**

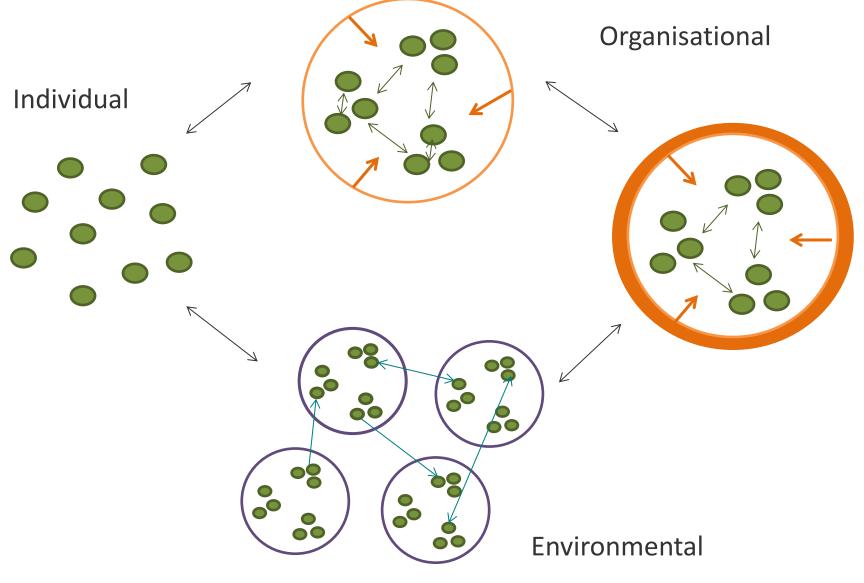

## Annelise Dennis, Capacity Development Approaches Coordinator (INASP)

Research and knowledge at the heart of development

Research and knowledge at the heart of development

## What we have learnt...

- CD needs to be planned for from the outset of a project (within and beyond)
- Collaborate with institutional partners and secure highlevel buy-in
- Understand the local context and build on existing capacities
- Build in M&E and learning from the start
- 'Best fit' for the context over 'best practice'; as one size does not fit all
